

VARNIBLUE 115-135

Strippable plate for in line coating with UV and Water base varnishes

Varniblue is a stripping plate designed for in line coating with sheet fed offset presses.

The plate is reusable many times and is applicable with suitable for **UV and Water base coatings**.

The combination of **Varniblue** plate with compressible underlayer **Varnicomp SR** enhances the coating quality results, ensuring a uniform and consistent coating transfer over a variety of substrates.

Using **UV coatings**, at the end of every print run, it is highly recommended to clean the plate surface with a wash in order to remove all residuals of coating, then rinse with water and dry .

FEATURE	BENEFITS
MICROGROUND RUBBER SURFACE	Excellent coating transfer with UV and WB coatings. Surface finishing ensures high quality results also with special coatings such as matt, soft touch. Easy cutting both manual and with CAD plotter.
ELASTOMER LAYER+ADHESIVE	Sharp and clean cut out. Resistance to swelling action due to UV coating and washes. Easy stripping and consistent peel strenght from lot to lot.
POLYESTER BASE	Dimensional stability with perfect register maintained over long and repeated runs. Specially treated surface increase adhesion without affecting the easiness of peel strength.

TECHNICAL DATA	
THICKNESS	1.15 mm +/- 0.05 mm 1.35 mm +/- 0.05 mm
TOTAL HARDNESS (SHORE A)	75
THICKNESS OF STRIPPING LAYER	0.8mm for 1,15 mm 1.0 mm for 1.35 mm
POLYESTER LAYER THICKNESS	0.35 mm
STANDARD ROLL WIDTHS	1450 mm-1700 mm (30 or 50 m length)

BARRING AND PUNCHING SERVICE

Plates' barring and punching service is available on demand ask **Kruse** for details info@kruseonline.com
